Testing: Jest / Mocha / Chai

PROFESSIONAL EXPERIENCE

Parthenon Software. | Portland, OR

May 2018 – Present

Front-End Developer

Engage in modern front-end web and application development for greenfield and brownfield projects in an agency-like environment using various technologies tailored to each project.

- Develop websites and web applications gaining extensive experience with JavaScript, web & CSS frameworks/libraries including React, Vue, Angular.js, Redux, jQuery, Python/Django, Php/Craft and SCSS.
- Ensure development best practices via responsive design, templating engines, CMS's, consuming APIs, e-commerce, analytics, virtual environments, module bundlers, version control and design tools.
- Thrive in a challenging, team-based atmosphere where learning new technologies quickly and efficiently is essential.
- Provide consultation for new projects & features from scratch or in maintaining existing codebases.

SQWAD Sports, Inc. | Portland, OR

November 2017 – April 2018

Front-End Developer (Contract)

Freelanced with this startup designing and building the front end of custom web gaming apps developed to engage fans and increase revenue for various sports organizations.

- Implemented clean, fast and responsive user interfaces with a modern stack including CSS3/Sass, React and ES6.
- Effectively built components from Sketch or Photoshop mockups with a small team for various voting, scratch-it and trivia based interactive web apps.
- Tested and optimized web apps for speed, cross-platform and cross-browser support.
- Proposed product enhancements and the adoption of new features, including new plugins and technologies.
- Participated in weekly walkthrough and inspection meetings; collaborated using Jira as a defect management tool.

Smarsh | Portland, OR

August 2016 – August 2017

Front-End Web Developer

Worked with Advisor Launchpad (a Smarsh company at the time) and built professional, modern websites for financial institutions from scratch via custom Photoshop mockups.

- Utilized HTML5, CSS3/Sass/PostCSS, JavaScript/jQuery, Bootstrap and Node.js build tools.
- Assisted with advising clients on optimal UX, layout, organization, form structure, images, and color themes.
- Debugged, QA'd, troubleshoot and improved various front-end development issues daily on multiple platforms supporting 5000+ custom or template websites.
- Imported sites into ALP 2.0, our customized Ektron CMS environment, built with an AngularJS front end utilizing robust HTML to ASP.NET build systems.
- Maintained and modified legacy code on older platforms.
- Administered extensive front-end testing to ensure cross-browser and cross-platform support.

Wacom | Portland, OR

July 2016 – August 2016

Web Content Specialist (Contract)

Updated and improved the national and international Wacom E-Commerce stores.

- Worked alongside designers to produce engaging web pages for new products and sponsored Wacom artists.
- Successfully created, updated and maintained web pages with tight deadlines using Sitecore and Insite CMS's.
- Used JIRA and Confluence to optimize team collaboration and issue tracking.

Smarsh | Portland, OR

September 2015 – May 2016

Web Content Administrator (Contract)

Worked with Advisor Launchpad (a Smarsh company at the time) to create, update and maintain the layout, marketing materials, content and forms of websites for financial institutions.

- Utilized HTML5, CSS3/Sass, JavaScript/jQuery and Bootstrap in multiple customized CMS environments.
- Troubleshoot and debugged various cross-browser responsive issues on hundreds of client websites.
- Eventually hired on full-time after a 9-month contract and promoted to Front-End Web Developer.

Self-Employed | Global

June 2008 – Present

Composer / Music Producer

12+ years of experience as an ASCAP member composing, producing and licensing music from home studio.

- Hundreds of placements worldwide in TV, film, advertising and video games in a variety of genres.
- Produce broadcast quality sound with expertise in engineering, mixing and mastering.
- Has become a side hustle since 2015.

EDUCATION

Epicodus, Portland, OR, January 2015 - May 2015

Learned how to build full-stack web applications coding 40+ hours per week for 4 months.

I furthered my knowledge of JavaScript, jQuery, Angular.js, Ember.js, SQL, Ruby/Rails and TDD in a paired programming learning environment.

Completed a 5-week Junior Developer Internship at Tiger Sheep, LCC where I worked alongside the development team researching, wire framing and building a support ticketing system.

Bachelor of Science, Music, concentration in Music Technology: Computer Programming & Sound Design

University of Oregon, Eugene – 2008

Minor in Business Administration
